

## **Module 4 Course Description & Outline**

### **“Extraction of Hopeless Teeth Followed by Immediate Surgical Placement of Dental Implants with Light Loading”**

**Rob D’Orazio D.D.S.  
Mark A. Iacobelli D.D.S.**

#### **Course Objective:**

To gain an understanding of the surgical skills required for successful atraumatic extraction of a hopeless tooth followed by the immediate placement of a dental implant with temporization to replace tooth form.

#### **Course Description**

Module 4 is a hands-on course that includes performing atraumatic extractions utilizing various instrumentations on patients provided by the student-doctors. Not only will ideal surgical outcomes be explored, but how to successfully handle less than ideal environments that may be encountered. Attendees will gain a better understanding of his/her surgical and prosthetic abilities thereby maximizing case selection as it relates to the participant’s skill level. Proficiency in bone grafting and augmentation is a prerequisite for this module.
