

Exceptional General Dental Care for the Quality Conscious

Non-Surgical Periodontal Therapy Aftercare

1. Fill both prescriptions today and initially begin taking your first doses together. After the initial dose, follow prescription instructions for subsequent doses
Do not drink any alcoholic beverages while taking these antibiotics. Finish all of the medications as prescribed.
2. If there is any discomfort after today's procedure, take any over-the-counter pain reliever that you would normally take. (Advil, Motrin or Tylenol)
3. Use the **Oral-B Braun Toothbrush** several times a day. This will be used instead of your manual toothbrush.
4. You will be using the Therasol (the blue liquid that was given to you) instead of toothpaste. Pour a small amount into a cup, dip the Braun toothbrush into the liquid and brush your teeth. Continue to dip the brush into the Therasol until all teeth have been cleaned. Use the remaining Therasol that is in the cup as a mouth rinse.

If you have any questions, please call our office at 440-845-7300.
